Profile

Data Scientist with over 4 years of experience in the banking sector, focused on developing scalable solutions with a direct impact on process optimization and decision making. Proven experience in Machine Learning, ETL processes, and data visualization, with a strong emphasis on churn and default prediction models, product selling propensity models, and quantitative finance models.

Professional experience

Data Scientist - Crédito Agrícola

(Oct 2025 to present)

- Designed and developed feature tables for the enterprise ML Feature Store, creating customer-level features across several domains to support advanced analytics and machine learning use cases.
- Worked on pipelines and frameworks to train, test, and evaluate machine learning models across multiple business use cases, contributing to the migration of the lead management modeling framework from SAS to Databricks and improving overall model performance.
- Designed and delivered internal AI workshops, collaborating with teams across the bank to identify AI use cases, gather requirements, and prototype solutions focused on process automation and efficiency gains.

Data Scientist & IT Disruptor - Novobanco

(Jul 2024 to Oct 2025)

- Lead technological innovation in risk model validation (IRB, IFRS9, VaR, ICAAP, ILAAP, IRRBB) by implementing ML/AI solutions to enhance model analysis and efficiency. Continuously propose and implement improvements in technological processes, optimizing workflows and increasing operational efficiency.
- I also developed models aimed at challenging the adopted methodology, achieving superior results compared to those produced by development teams.
- Provided assessments of data quality in collaboration with the Data Department, ensuring model robustness and compliance.
- Responsible for performing web scraping using Python to gather macroeconomic and financial data, contributing to enrich datasets for model development and analysis.

Data Scientist - Banco BPI

(Sept 2023 to Jun 2024)

- Developed end-to-end machine learning projects in Google Cloud Platform (GCP) as a member of the AI Center of Excellence.
- Managed ETL processes and conducted customer behavior analysis to derive actionable insights.
- Built and optimized machine learning models, including churn detection and customer propensity models.

Data Analyst - BNP Paribas

(2 teams rotation internship - Sept 2022 to Aug 2023)

- Developed and automated counterparty risk reports using Python, reducing report generation time by 70%, which allowed risk analysts to dedicate more time to conducting deeper and more comprehensive analyses.
- Migrated processes from R to Python, increasing operational efficiency.
- Trained and empowered users on new tools and frameworks, including developing comprehensive documentation for these tools.
- Conducted exposure simulations tailored to the specific requirements of traders, improving risk assessment processes and supporting more informed trading decisions.
- Developed Power BI dashboards to enhance data visualization insights, increasing the team's ability to identify counterparty risk trends.

Academic education

- Data Science and Advanced Analytics** - Porto Business School (2023)
- MSc. Mathematics with specialization in Statistics, Optimization and Financial Math** - University of Coimbra (2020-2022)
- Master in Big Data applied to Football** - University of Murcia (2021-2022)
- BSc. Mathematics** - University of Coimbra (2017-2020)

Languages

- Portuguese** - Native
- English** - Advanced
- Spanish** - Basic

Volunteering

- Scouting Report Analyst - Proscout
- Internship with the data department of Sporting CP

Programming languages & Frameworks

- Python (Pandas, Numpy, xgboost, Scikit-learn, Tensorflow, Matplotlib, Seaborn, Beautifulsoup, Langchain)
- PySpark
- SQL
- R
- PySpark
- Flask, Fast API
- Rest APIs

Skills

- ETL processes
- Machine Learning
- GenAI (LLMs, RAG, VectorDBs)
- Data visualization
- Data analytics
- Time series forecasting
- Web scraping

Tools

- Google Cloud Platform
- Databricks
- Azure DevOps
- Git
- PowerBI
- Tableau
- Microsoft Excel
